## INDEPENDENT AUDITORS' REPORT

To the contractholders of Assumption Life investment funds

We have audited the financial statements of the Assumption Life investment funds listed in note 2 of the supplementary notes to the financial statements (hereafter named the «Funds»), which comprise the statement of net assets and portfolio investments as at December 31, 2011 and the statements of operations and changes in net assets of each of the Funds for the year then ended, and a summary of significant accounting policies and other explanatory information.

### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian generally accepted accounting principles, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

### Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Assumption Life investment funds as at December 31, 2011 and the results of operations and changes in net assets of each of the Funds for the year then ended in accordance with Canadian generally accepted accounting principles.

## Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years.

	2011	2010	2009	2008	2007
<b>Series A (No load contracts established prior to 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	12.10	12.35	11.40	10.12	12.92
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	18,747	22,136	22,542	22,363	30,974
Number of units outstanding at December 31	1,549,318	1,792,370	1,977,363	2,209,778	2,397,331
Management expense ratio (%) <sup>1</sup>	1.32	1.28	1.24	1.28	1.35
<b>Series B (No load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	9.56	10.01	9.46	8.59	11.22
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	3,243	3,765	3,667	3,145	4,632
Number of units outstanding at December 31	339,236	376,135	387,610	366,125	412,844
Management expense ratio (%) <sup>1</sup>	3.42	3.31	3.20	3.20	3.23
<b>Series C (Back-end load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	9.78	10.20	9.62	8.72	11.36
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	3,689	4,128	3,610	2,828	2,821
Number of units outstanding at December 31	377,194	404,673	375,220	324,354	248,364
Management expense ratio (%) <sup>1</sup>	3.14	3.07	2.99	2.99	3.02
<b>Portfolio turnover rate for the period ended Dec. 31 (%) <sup>2</sup></b>	70.88	109.61	47.41	33.68	71.29

<sup>1</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>2</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years.

	2011	2010	2009	2008	2007
<b>Series A (No load contracts established prior to 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	9.38	-	-	-	-
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	277	-	-	-	-
Number of units outstanding at December 31	29,495	-	-	-	-
Management expense ratio (%) <sup>1</sup>	2.83	-	-	-	-
<b>Series B (No load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	9.27	-	-	-	-
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	143	-	-	-	-
Number of units outstanding at December 31	15,410	-	-	-	-
Management expense ratio (%) <sup>1</sup>	3.94	-	-	-	-
<b>Series C (Back-end load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	9.29	-	-	-	-
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	390	-	-	-	-
Number of units outstanding at December 31	42,033	-	-	-	-
Management expense ratio (%) <sup>1</sup>	3.74	-	-	-	-
<b>Portfolio turnover rate for the period ended Dec. 31 (%)<sup>2</sup></b>	67.46	-	-	-	-

<sup>1</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>2</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years.

	2011	2010	2009	2008	2007
<b>Series A (No load contracts established prior to 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	9.77	-	-	-	-
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	105	-	-	-	-
Number of units outstanding at December 31	10,797	-	-	-	-
Management expense ratio (%) <sup>1</sup>	2.67	-	-	-	-
<b>Series B (No load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	9.65	-	-	-	-
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	402	-	-	-	-
Number of units outstanding at December 31	41,625	-	-	-	-
Management expense ratio (%) <sup>1</sup>	3.83	-	-	-	-
<b>Series C (Back-end load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	9.68	-	-	-	-
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	977	-	-	-	-
Number of units outstanding at December 31	100,964	-	-	-	-
Management expense ratio (%) <sup>1</sup>	3.58	-	-	-	-
<b>Portfolio turnover rate for the period ended Dec. 31 (%)<sup>2</sup></b>	26.45	-	-	-	-

<sup>1</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>2</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years.

	2011	2010	2009	2008	2007
<b>Series A (No load contracts established prior to 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	10.21	-	-	-	-
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	88	-	-	-	-
Number of units outstanding at December 31	8,644	-	-	-	-
Management expense ratio (%) <sup>1</sup>	2.55	-	-	-	-
<b>Series B (No load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	10.18	-	-	-	-
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	428	-	-	-	-
Number of units outstanding at December 31	42,043	-	-	-	-
Management expense ratio (%) <sup>1</sup>	2.90	-	-	-	-
<b>Series C (Back-end load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	10.20	-	-	-	-
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	138	-	-	-	-
Number of units outstanding at December 31	13,560	-	-	-	-
Management expense ratio (%) <sup>1</sup>	2.71	-	-	-	-
<b>Portfolio turnover rate for the period ended Dec. 31 (%)<sup>2</sup></b>	136.64	-	-	-	-

<sup>1</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>2</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

<sup>1</sup> Assumption/Louisbourg U.S. Equity Fund holds 159,124 units (original cost \$1,612,975) and invests 100% in the Louisbourg US Equity Fund, the underlying fund managed by Louisbourg Investments Inc.

<sup>2</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>3</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years.

	2011	2010	2009	2008	2007
<b>Series A (No load contracts established prior to 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	12.63	11.64	10.95	10.32	10.50
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	1,048	1,477	1,492	1,392	1,213
Number of units outstanding at December 31	82,975	126,853	136,211	134,928	115,488
Management expense ratio (%) <sup>2</sup>	2.27	2.01	1.91	1.99	2.08
<b>Series B (No load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	10.82	10.13	9.68	9.26	9.57
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	759	839	839	1,321	774
Number of units outstanding at December 31	70,122	82,834	86,666	142,655	80,922
Management expense ratio (%) <sup>2</sup>	2.45	2.38	2.31	2.61	2.33
<b>Series C (Back-end load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	11.05	10.33	9.85	9.40	9.70
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	1,279	609	586	419	370
Number of units outstanding at December 31	115,713	58,952	59,520	44,620	38,131
Management expense ratio (%) <sup>2</sup>	2.20	2.15	2.10	2.10	2.12
<b>Portfolio turnover rate for the period ended Dec. 31 (%) <sup>3</sup></b>	87.26	89.47	58.15	55.29	80.38

<sup>1</sup> Assumption/Louisbourg Fixed Income Fund holds 289,276 units (original cost \$2,970,730) and invests 100% in the Louisbourg Canadian Bond Fund, the underlying fund managed by Louisbourg Investments Inc.

<sup>2</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>3</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management expense ratio (%) <sup>2</sup>	2.91	2.85	2.78	2.78	2.81
<b>Portfolio turnover rate for the period ended Dec. 31 (%) <sup>3</sup></b>	203.45	242.30	257.23	292.85	258.34

<sup>1</sup> Assumption/Louisbourg Momentum Fund holds 599,052 units (original cost \$5,989,241) and invests 100% in the Louisbourg Quantitative Canadian Equity Fund, the underlying fund managed by Louisbourg Investments Inc.

<sup>2</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>3</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

<sup>1</sup> Assumption/Fidelity Global Health Care Fund holds 8,055 units (original cost \$152,448) and invests 100% in the Fidelity Global Health Care Fund, the underlying fund managed by Fidelity Investments Canada Limited.

<sup>2</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>3</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

<sup>1</sup> Assumption/Fidelity Europe Fund holds 47,719 units (original cost \$1,281,757) and invests 100% in Fidelity Europe Fund, the underlying fund managed by Fidelity Investments Canada Limited.

<sup>2</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>3</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years.

	2011	2010	2009	2008	2007
<b>Series A (No load contracts established prior to 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	10.20	10.71	9.90	9.10	13.34
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	27	24	29	25	21
Number of units outstanding at December 31	2,606	2,264	2,967	2,766	1,547
Management expense ratio (%) <sup>2</sup>	2.88	2.78	2.68	2.80	2.70
<b>Series B (No load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	9.74	10.33	9.66	8.97	13.29
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	70	21	8	9	4
Number of units outstanding at December 31	7,176	2,010	827	958	291
Management expense ratio (%) <sup>2</sup>	3.99	3.87	3.73	3.73	3.76
<b>Series C (Back-end load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	9.79	10.37	9.68	8.98	13.30
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	68	87	89	65	19
Number of units outstanding at December 31	6,920	8,428	9,206	7,272	1,412
Management expense ratio (%) <sup>2</sup>	3.84	3.73	3.62	3.62	3.66
<b>Portfolio turnover rate for the period ended June 30 (%)<sup>3</sup></b>	119.00	219.00	270.00	245.00	178.00

<sup>1</sup> Assumption/Fidelity American Disciplined Equity<sup>®</sup> Fund holds 14,669 units (original cost \$153,903) and invests 100% in the Fidelity American Disciplined Equity<sup>®</sup> Fund, the underlying fund managed by Fidelity Investments Canada Limited.

<sup>2</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>3</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years.

	2011	2010	2009	2008	2007
<b>Series A (No load contracts established prior to 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	8.56	8.75	8.42	7.33	8.85
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	770	856	643	462	693
Number of units outstanding at December 31	89,920	97,841	76,321	63,030	78,328
Management expense ratio (%) <sup>2</sup>	2.92	2.82	2.72	2.71	2.73
<b>Series B (No load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	7.53	7.80	7.61	6.71	8.19
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	140	162	181	78	159
Number of units outstanding at December 31	18,653	20,829	23,744	11,634	19,454
Management expense ratio (%) <sup>2</sup>	4.21	4.07	3.94	3.94	3.98
<b>Series C (Back-end load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	7.70	7.95	7.74	6.81	8.30
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	206	266	293	207	453
Number of units outstanding at December 31	26,757	33,451	37,855	30,433	54,534
Management expense ratio (%) <sup>2</sup>	3.95	3.84	3.73	3.73	3.76
<b>Portfolio turnover rate for the period ended March 31 (%) <sup>3</sup></b>	73.16	90.85	85.21	47.36	58.67

<sup>1</sup> Assumption/CI Global Managers® Corporate Class Fund holds 87,957 units (original cost \$1,036,140) and invests 100% in the CI Global Managers® Corporate Class Fund, the underlying fund managed by CI Investments Inc.

<sup>2</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>3</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years.

	2011	2010	2009	2008	2007
<b>Series A (No load contracts established prior to 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	15.93	17.40	16.18	13.39	17.55
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	25,348	28,466	24,282	15,623	11,273
Number of units outstanding at December 31	1,591,222	1,635,968	1,500,725	1,166,778	642,342
Management expense ratio (%) <sup>2</sup>	2.90	2.79	2.64	2.66	2.70
<b>Series B (No load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	14.18	15.67	14.73	12.33	16.36
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	7,518	9,125	9,270	8,124	8,581
Number of units outstanding at December 31	530,153	582,302	629,336	658,861	524,507
Management expense ratio (%) <sup>2</sup>	4.00	3.90	3.78	3.78	3.82
<b>Series C (Back-end load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	14.49	15.97	14.98	12.52	16.57
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	8,926	11,335	10,656	9,975	11,056
Number of units outstanding at December 31	615,995	709,758	711,349	796,755	667,240
Management expense ratio (%) <sup>2</sup>	3.79	3.68	3.57	3.57	3.60
<b>Portfolio turnover rate for the period ended March 31 (%) <sup>3</sup></b>	18.45	15.72	6.89	17.89	13.20

<sup>1</sup> Assumption/CI Harbour Growth & Income Fund holds 2,648,518 units (original cost \$40,689,162) and invests 100% in the CI Harbour Growth & Income Fund, the underlying fund managed by CI Investments Inc.

<sup>2</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>3</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

<sup>1</sup> Assumption/CI American Value Fund holds 8,709 units (original cost \$142,383) and invests 100% in the CI American Value Fund, the underlying fund managed by CI Investments Inc.

<sup>2</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>3</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

### Portfolio turnover rate for the period ended Sept. 30 (%) <sup>3</sup>

	2011	2010	2009	2008	2007
	1.66	6.89	1.06	8.72	10.25

<sup>1</sup> Assumption/AGF International Stock Class Fund holds 50,196 units (original cost \$634,193) and invests 100% in the AGF International Stock Class Fund, the underlying fund managed by AGF Funds Inc.

<sup>2</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>3</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Net assets at December 31 (000's)	74	-	-	-	-
Number of units outstanding at December 31	8,742	-	-	-	-
Management expense ratio (%) <sup>2</sup>	4.36	-	-	-	-
<b>Series C (Back-end load contracts established since 2002)</b>					
<b>The Fund's Net Asset Value per Unit</b>					
Net asset value at December 31 (dollars per unit)	8.46	-	-	-	-
<b>Ratios and Supplemental Data</b>					
Net assets at December 31 (000's)	151	-	-	-	-
Number of units outstanding at December 31	17,833	-	-	-	-
Management expense ratio (%) <sup>2</sup>	4.02	-	-	-	-
<b>Portfolio turnover rate for the period ended Sept. 30 (%) <sup>3</sup></b>	12.50	-	-	-	-

<sup>1</sup> Assumption/AGF Emerging Markets Fund holds 26,707 units (original cost \$322,377) and invests 100% in the AGF Emerging Markets Fund, the underlying fund managed by AGF Funds Inc.

<sup>2</sup> The management expense ratio is calculated by dividing the total of management fees and administrative expenses by the average net assets and also includes the management expense ratio of the underlying funds, when applicable.

<sup>3</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## 1 . Organization

### *Assumption Mutual Life Insurance Company*

Assumption Mutual Life Insurance Company "Assumption Life" is the issuer of the variable deferred annuity policies in respect of which the Assumption Life Investment Funds, "the Funds", were created. Assumption Life is an insurance company incorporated as a mutual life insurance company on March 30, 1968, under a private law of the Province of New Brunswick's Legislative Assembly. Assumption Life is currently doing business in all Canadian provinces. Its head office is located at 770 Main Street, Moncton, New Brunswick, E1C 8L1.

## 2 . Funds

During the year, the following funds were established:

- Assumption Growth Portfolio
- Assumption Balanced Growth Portfolio
- Assumption Balanced Portfolio
- Assumption Conservative Portfolio
- Assumption/Fidelity Far East Fund
- Assumption/AGF Global High Yield Bond Fund
- Assumption/AGF Emerging Markets Fund
- Assumption/AGF Global Resources Class Fund

In 2011, the following segregated funds « the funds » underwent a name change:

- Assumption/Montrusco Bolton Canadian Small Capitalization Equity Fund is now named Assumption/Louisbourg Canadian Small Capitalization Equity Fund;
- Assumption/Montrusco Bolton TSX Momentum Fund is now named Assumption/Louisbourg Momentum Fund.

Each Fund is a segregated Fund established by Assumption Life. The Funds follow the guidelines on individual variable insurance contracts relating to segregated funds established by the Canadian Life and Health Insurance Association Inc. The Assumption Life Funds are managed by Assumption Life; the Louisbourg Funds are managed by Louisbourg Investments Inc.; the Fidelity Funds are managed by Fidelity Investments Canada Limited; the CI Funds are managed by CI Investments Inc. and the AGF Funds are managed by AGF Funds Inc.

The Assumption Life Funds invest in units of a number of underlying funds, while the Louisbourg Funds, Fidelity Funds, CI Funds and AGF Funds invest in units of only one underlying fund.

The following are the segregated funds established by Assumption Life:

### **Assumption Life Funds**

- Assumption/Louisbourg Balanced Fund
- Assumption Growth Portfolio
- Assumption Balanced Growth Portfolio
- Assumption Balanced Portfolio
- Assumption Conservative Portfolio

### **Louisbourg Funds**

- Assumption/Louisbourg U.S. Equity Fund
- Assumption/Louisbourg Canadian Dividend Fund
- Assumption/Louisbourg Canadian Equity Fund
- Assumption/Louisbourg Fixed Income Fund
- Assumption/Louisbourg Money Market Fund
- Assumption/Louisbourg Canadian Small Capitalization Equity Fund
- Assumption/Louisbourg Momentum Fund

### **Fidelity Funds**

- Assumption/Fidelity True North<sup>®</sup> Fund
- Assumption/Fidelity Overseas Fund
- Assumption/Fidelity Global Health Care Fund
- Assumption/Fidelity Global Technology Fund
- Assumption/Fidelity Canadian Opportunities Fund
- Assumption/Fidelity Europe Fund
- Assumption/Fidelity Canadian Asset Allocation Fund

### **Fidelity Funds (continued)**

- Assumption/Fidelity Monthly Income Fund
- Assumption/Fidelity American Disciplined Equity<sup>®</sup> Fund
- Assumption/Fidelity North Star<sup>®</sup> Fund
- Assumption/Fidelity Far East Fund

### **CI Funds**

- Assumption/CI Global Managers<sup>®</sup> Corporate Class Fund
- Assumption/CI Synergy American Fund
- Assumption/CI Signature Canadian Bond Fund
- Assumption/CI Harbour Growth & Income Fund
- Assumption/CI Signature High Income Fund
- Assumption/CI American Value Fund
- Assumption/CI Synergy Global Corporate Class Fund
- Assumption/CI Global Small Companies Fund

### **AGF Funds**

- Assumption/AGF International Stock Class Fund
- Assumption/AGF Dividend Income Fund
- Assumption/AGF Global High Yield Bond Fund
- Assumption/AGF Emerging Markets Fund
- Assumption/AGF Global Resources Class Fund

## 3 . Summary Of Significant Accounting Policies

The financial statements are established in accordance with Canadian Generally Accepted Accounting Principles (GAAP). The establishment of the financial statements in accordance with these principles requires estimates and assumptions made by management that affect the amounts of assets, liabilities, income and expenses presented in the financial statements and the supplementary notes.

The significant accounting standards followed by the Funds are as follows :

### **Valuation of investments**

Investments are categorized as held for trading in accordance with Section 3855, "Financial Instruments – Recognition and Measurement" ("Section 3855") and are recorded at their fair value.

Investments in underlying funds are valued at the closing net asset value of the units owned as established by the manager of the underlying funds at the valuation date.

Section 3855 requires the fair value of financial instruments to be measured based on investments' bid/ask price depending on the type of investment and investment position (long/short). For the purpose of processing contractholder transactions, net asset value is calculated based on the closing market price (referred to as "Net Asset Value"), while for financial statement purposes net asset value is calculated based on bid/ask price (referred to as "Net Assets").

As each of the Funds invests solely in units of one or more underlying funds, Section 3855 does not impact the Funds' valuation of investments since the Funds' investments are priced based on the net asset value per unit of the underlying fund or funds. Accordingly, the Funds' net asset value per unit and the net assets per unit figures are the same.

# Notes to Financial Statements

For the period ended December 31, 2011

## 3 . Summary Of Significant Accounting Policies (continued)

### *Investment transactions and income*

Investment transactions are accounted for on the trade date, which is the date the order to buy or sell is executed.

Interest income is recorded on the accrual basis. Dividend income is recorded on the date of record. Distributions from underlying funds are recorded when declared by the underlying funds.

Realized gains (losses) on sale of portfolio investments are determined as the net of proceeds of sale and original cost if acquired in the current month, or the net of proceeds of sale and fair value at the previous month end, if acquired prior to the current month.

Unrealized gains (losses) on portfolio investments are determined as the excess (deficiency) of fair value over book value of portfolio investments held. Book value is determined as original cost plus (minus) prior year end cumulative unrealized gain (loss).

### *Unit valuation and valuation date*

Net asset value per unit is determined each day at the close of trading of the Toronto Stock Exchange and remains in effect until the next close of trading, at which time the determination of the net asset value per unit is made. The unit valuation for each Fund is made by dividing the total value of the Fund's net assets by the total number of units outstanding in the Fund.

### *Future accounting changes*

In March 2012, the Accounting Standards Board (AcSB) of the CICA approved a further one-year deferral of adoption of IFRS for investment companies, which include investment funds. Investment companies may continue to apply existing GAAP standards until fiscal years beginning on or after January 1, 2014.

## 4 . Financial Instrument Risks

### **Risk management**

The Funds invest solely in units of underlying funds and are exposed to a variety of financial instrument risks: credit risk, liquidity risk and market risk (including interest rate risk, currency risk and other price risk). The level of risk to which each Fund is exposed depends on the investment objective and the type of investments held by the underlying fund.

The value of investments within an underlying fund portfolio can fluctuate daily as a result of changes in prevailing interest rates, economic conditions, market conditions and company specific news related to investments held by the underlying fund. The underlying fund manager manages the potential effects of these financial risks on the Fund's performance by employing and overseeing professional and experienced portfolio advisors that regularly monitor the fund's positions, market events and diversify investment portfolios within the constraints of the investment guidelines.

The Funds do not manage their underlying funds and therefore the quantitative and qualitative risk disclosures have not been disclosed. For further information on the financial instrument risks of the underlying funds and the sensitivity to price changes, please refer to the financial statements of the underlying funds. You will also find risk disclosures in the Funds' Information folder on the Company's Web site, [www.assumption.ca](http://www.assumption.ca).

### **Credit risk**

Credit risk is the risk that a security issuer or counterparty to a financial instrument will fail to meet its financial obligations. The fair value of a debt instrument includes consideration of the credit worthiness of the debt issuer. The carrying amount of debt instruments represents the credit risk exposure of each underlying Fund.

### **Liquidity risk**

Liquidity risk is defined as the risk that a fund may not be able to settle or meet its obligations on time or at a reasonable price. The underlying funds are exposed to liquidity risk through daily cash redemptions of units. The majority of the underlying funds' investments are traded on an active market and can therefore be readily realized.

### **Interest rate risk**

Interest rate risk arises when an underlying fund invests in interest-bearing financial instruments such as bonds. The underlying fund is exposed to the risk that the value of such financial instruments will fluctuate because of changes in the prevailing levels of market interest rates. In general, as interest rates rise, the price of a fixed rate bond falls, and vice versa.

### **Currency risk**

Currency risk is the risk that financial instruments that are denominated or exchanged in a currency other than the Canadian dollar, which is the Funds' and the underlying funds' reporting currency, will fluctuate due to changes in exchange rates. However, the underlying funds are exposed to currency risk to the extent that their investments are denominated or traded in a foreign currency.

### **Other price risk**

Other price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk). The value of each investment is influenced by the outlook of the issuer and by general economic and political conditions, as well as industry and market trends. All securities present a risk of loss of capital.

## 5 . Capital Management

The Funds consider their net assets to be their respective capital. The capital of the Fund is managed in accordance with the Fund's investment objectives. The relevant capital movements are disclosed in the Statement of Changes in Net Assets of each Fund. The Funds have no restrictions or specific capital requirements.

# Notes to Financial Statements

For the period ended December 31, 2011

## 6 . Fair Value Of Financial Instruments

The Funds are required to classify financial instruments measured at fair value using a fair value hierarchy. CICA handbook Section 3862, "Financial Instruments – Disclosures" establish a fair value hierarchy that prioritizes the inputs to fair value measurement. The three levels of the fair value hierarchy are:

Level 1: Quoted prices are available in active markets for identical investments as of the reporting date. Quoted price for these investments are not adjusted even in situations where a large position and a sale could reasonably impact the quoted price.

Level 2: Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date.

Level 3: Pricing inputs are unobservable. The inputs into the determination of fair value require significant judgment or estimation.

The Funds invest only in other investment funds. For further information on the fair value hierarchy of the underlying funds, please refer to the financial statements of the underlying funds.

## 7 . Other Administrative Expenses

Included in "Other Administrative Expenses" are all fees (except for the management fees payable by the Funds), and all other expenses incurred during the ordinary course of business in relation to the establishment, management, and operation of the Funds. They include, among others, legal fees, audit fees, safekeeping fees, administrative fees, bank charges, registration fees with regulators, the production and distribution of financial data, taxes and any other expenses incurred for the operation of the Funds.

## 8 . Management Fees

Management fees means the fees charged to administer the Funds. Management fees also include management fees of the underlying funds, so there is no duplication of management fees. Insurance fees, for the cost of the guarantee at maturity and guarantee upon death, are included in the management fees. Management fees, expressed as a percentage, are deducted daily from the assets of each Fund before calculating its unit value.

The management of the Assumption Life Funds is carried out under the overall authority of the board of directors of Assumption Life, which subcontracts the management of the Funds to Louisbourg Investments Inc., whose shares are owned by Assumption Life (60%), Monrusco Bolton Investments Inc. (15%) and 647439 NB Inc. (25%). The company 647439 NB Inc. is 100% owned by some managers of Louisbourg Investments Inc. Louisbourg Investments Inc. is responsible for the investment analysis, recommendations, decisions, and the purchase and sale of the securities in respect to the Funds.

The Louisbourg Funds, the Fidelity Funds, the CI Funds and the AGF Funds are managed, on a day-to-day basis, by Louisbourg Investments Inc., Fidelity Investments Canada Limited, CI Investments Inc. and AGF Funds Inc. As managers, they are responsible for the investment analysis, recommendations, decisions, and the purchase and sale of securities for the Funds.

## 9 . Income Taxes

The Funds are deemed to be inter-vivos trusts under the provisions of the Income Tax Act (Canada) and are deemed to have allocated their income to the contractholders. Each Fund's net capital gains (losses) are deemed to be those of the contractholders. Accordingly, the Funds are not subject to income tax on their net income, including net realized capital gains for the year.

## 10 . Comparative Figures

To conform to the presentation adopted in the current year, certain amounts from prior years have been reclassified.

## 11 . Investments of Underlying Funds

The financial statements of the underlying funds are available upon request by contacting Assumption Life.
