

## Case Scenario #11

### Recent Graduate with a History of Microdosing

**Client:** Jakob, 25 years old

#### Insurance Needs

Jakob, 25, a recent university graduate, is starting a new chapter in the big city with his dream job and newfound independence. After discussing financial planning with his parents, he realized the importance of life insurance to protect the financial commitments he's about to make.

#### Lifestyle History

At age 22, during university, Jakob experimented with micro-dosing hallucinogens. Since then, he's focused on his personal growth, moving beyond that phase. Today, he occasionally enjoys marijuana edibles, but his priorities remain centered on his well-being and continued personal and professional development.

#### Qualifies for

Immediate **Simplified Issue** coverage of up to \$750,000 with **Assumption Life's Platinum Protection Term**.

#### Tailored Solution

Jakob opts for a 20-year term policy with a coverage amount of \$200,000 to ensure his financial obligations are protected.

**Total monthly premium: \$23.40**
