This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The MER includes an insurance fee that is charged for the selected guarantee. For details, please refer to the information folder and the contract.

Who is this fund for?

This fund may be right for a person seeking potential for interest income accumulation and who requires preservation of capital and who has no tolerance for the ups and downs of the market.

How has the fund performed?

This section tells you how the fund has performed over the past 10 years for a contract holder who chooses the 75/100 Back-end load (series C). Returns are after the MER has been deducted.

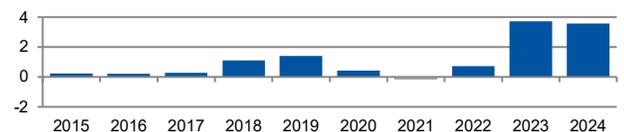

It's important to note that this doesn't tell you how the fund will perform in the future. Also, your actual return will depend on the investment option you choose and on your personal tax situation. The performance shown below is for the 75/100 back-end load (series C), which has a lower management fee than the 75/100 no-load (series B), therefore the return on 75/100 no-load (series B) would be slightly lower.

2. Ongoing expenses

The management expense ratio (MER) includes the management fees, the operating expenses, the insurance fee and applicable sales taxes for the selected fund guarantee. You don't pay these expenses directly. They affect you because they reduce the return you get on your investment. For details on how the guarantees work, see your variable annuity contract or your information folder.
